

ILLUMINATED AD

Very visible way to present your business, day and night.

Perfectly draws customer's attention. We offer a variety of types of illuminated advertising, depending on your needs. It can be used outdoors or indoors. We offer a variety of shapes and sizes to create a backlit ad. We use energy-efficient LED lighting.

SPATIAL LETTERS

Thanks to the light colour similar to daylight in LED modules, our light letters always attract attention.

It is possible to use different colour modules, which allow for message modifications.

SPATIAL LETTERS

Information

Minimum size [cm]
20
Maximum size [cm]
150

*price of a letter without lighting

from 35,6 GBP *

The images in the catalogue are for illustrative purposes only and the appearance of individual accessories may vary throughout the year, depending on availability.

Internal/external
wall mount

Ideal for hotels, factories

5 different
mountings

SEMAPHORE

Is a spatial light form that is usually mounted on buildings, perpendicularly to the communication routes.

It's a great idea to highlight dining or service points on busy streets or promenades. Semaphores are ideal for food advertising, company logo light boxes or just image advertising.

SEMAPHORE

Information

LIGHT BOXES

Placed flat on the wall surface, backlit, with a choice of shapes and sizes, differentiate your business from the competition.

Most often ordered as signs above the entrance of shops or service points, such as hairdressing and beauty shops or as image advertisement. They are also ideal for labeling public institutions.

NEON FLEX

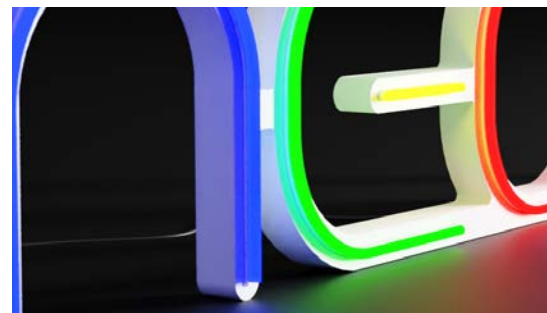

Traditional light advertising in a modern design.

Glass neon signs have become obsolete and have been replaced by new, flexible plastic. They allow to apply different colours and shapes in one. With LED technology, flex neon signs are more efficient and resistant, while providing uniform, coloured light. The forms we suggest are a modern approach to traditional neon signs, appreciated for years.

NEON

*price is for one sign with a height of 20 cm

 **from 49,8 GBP***

The images in the catalogue are for illustrative purposes only and the appearance of individual accessories may vary throughout the year, depending on availability.

The ability to create interesting spatial forms

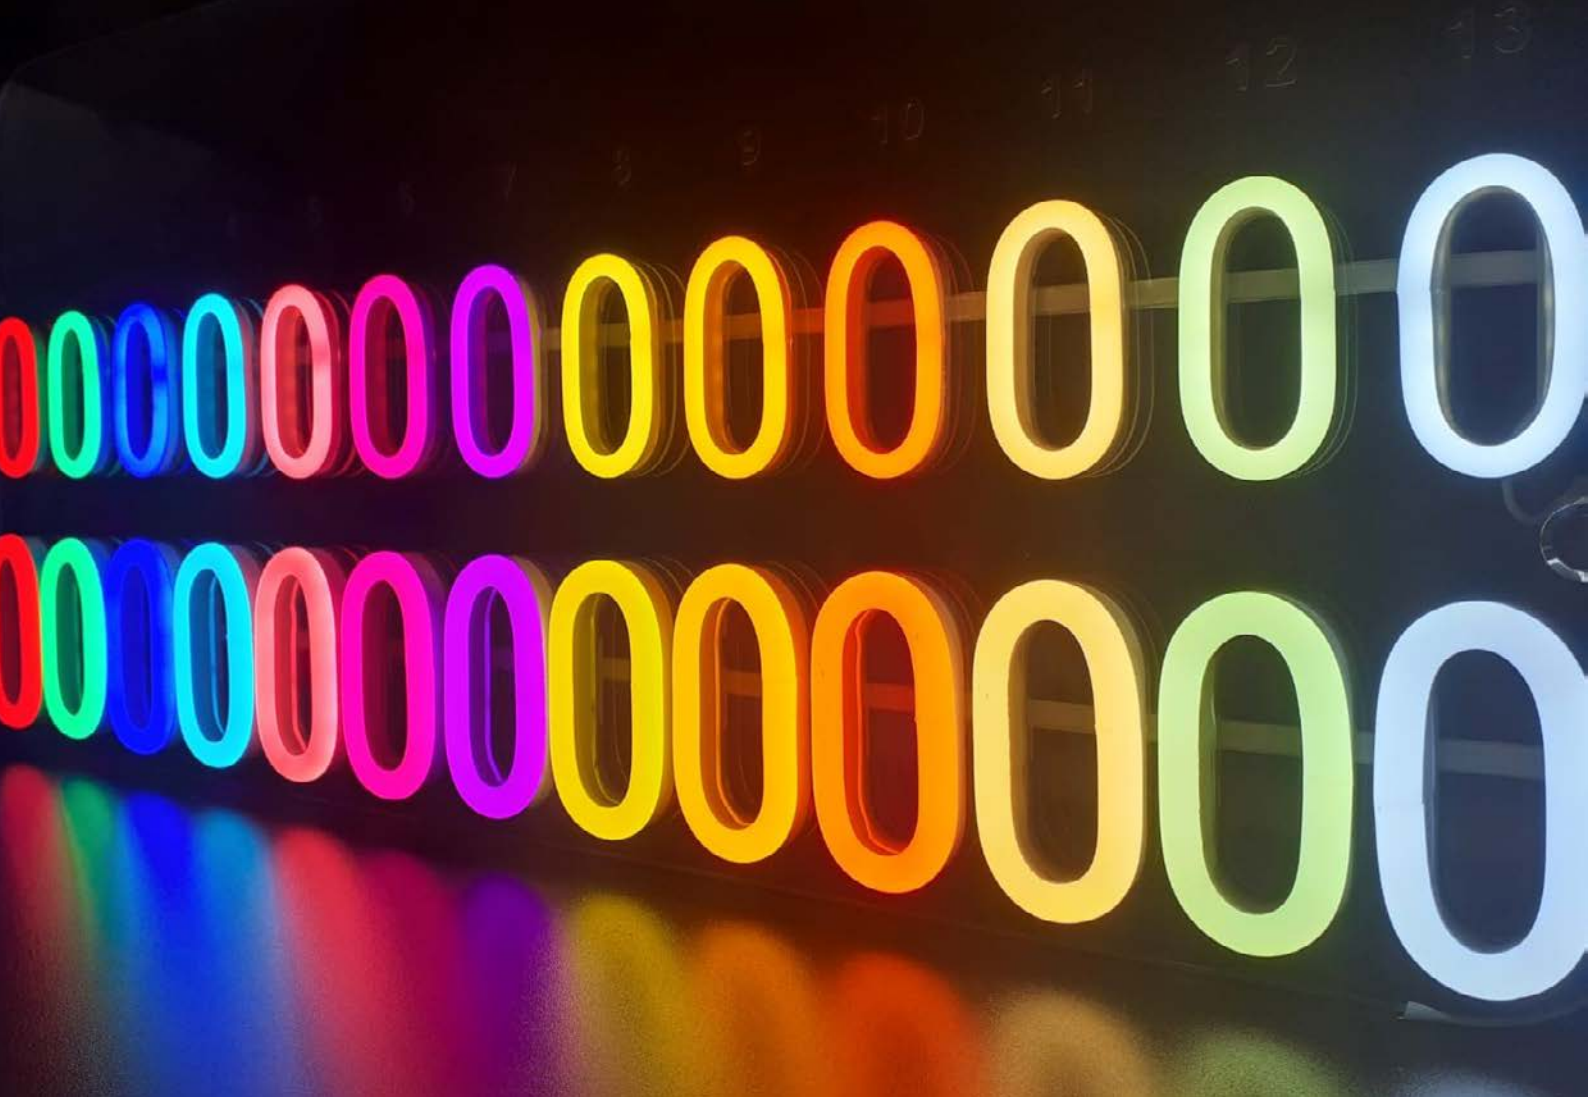

Excellent resistance and LED light

For internal use

Often selected as an interior design element

ENGRAVED PLATES

Combination of LED backlight technology and CNC engraving gives you exceptional visual effects.

The combination of these two technologies allowed us to create a product that was appreciated by both residential and commercial interior designers. Trimming plexiglass panels or combining them with Dibond gives you an extremely interesting effect of drawing with light.

ENGRAVED PLATES

Information

Minimum size [cm]

20x20

Maximum size [cm]

300x200

*price applies to size 30 x 30 cm

from 54,4 GBP*
